ABSTRACT

This report presents detailed information concerning the member institutions of the United Negro College Fund (UNCF), an organization which includes 41 historically black colleges and universities in the United States. Data are organized within the categories of enrollment, admission, faculty and staff, degrees, student financial aid, college costs, institutional finances, and endowment. Highlights of the data include the following: enrollments declined to 54,098 in fall 1994, a 1.2 percent decrease over the previous year, the first decrease since the mid 1980s; about two-thirds of all UNCF students came from the Southeast; the rate of enrollment increase for women has been larger than that of men; applications for admission have increased by 72 percent between 1986 and 1993; faculty salaries were only two-thirds as high as those found at other comparable institutions; the percentage of full-time faculty who hold doctorates has increased from 52 percent to 57 percent; the field of business and management produced the highest number of bachelor degree graduates in 1992-93; and the number of graduates in education increased by 15 percent. Thirty-one appendices provide tables presenting additional data. (CK)

STATISTICAL REPORT

UNITED NEGRO COLLEGE FUND

Acknowledgment and Foreword

In producing this 1994 Statistical Report of the United Negro College Fund, I wish to acknowledge the wonderful support and cooperation from the many persons at the member UNCF institutions who aided in the collection and editing of the data which appears in this edition. In particular, I would like to thank the registrars, institutional research officers, and their staffs for their splendid work. I also wish to thank Karen Winters, the administrative assistant in the office of the Leadership and Organizational Development Program, for her efficiency in compiling much of the data. I appreciate the supportive leadership of William H. Gray III, the president and CEO of UNCF. As always, Alan Kirschner, Vice President for Programs and Public Policy at UNCF, was extremely helpful in supplying much needed editorial insights.

Hugh R. Fordyce

HIGHLIGHTS FROM THE 1994 UNCF STATISTICAL REPORT

✔ For the second straight year, enrollments at all UNCF colleges and universities exceeded 54,000; the 1994 enrollment figure of 54,098 was 27 percent larger than that recorded in 1986.

✔ After several years of decline in the 1980's, African-American enrollments, as a percentage of all U.S. college enrollments, have been steadily increasing. African-Americans constituted 10.2 percent of the undergraduate enrollment in the U.S. in 1992.

✔ About two-thirds of all UNCF students come from the Southeast. Over the past ten years, however, the state that has shown the most growth in sending students to UNCF colleges has been California. Since 1983, the number of students coming from California has increased from 733 to 2,028, a 178 percent increase.

✔ Cities which send at least 1,000 students to UNCF colleges include Atlanta, Birmingham, Chicago, Memphis, New York City, and New Orleans.

✔ Since 1986, the enrollment of women has increased 27 percent; for men, 23 percent. Women constitute 59 percent of the total enrollment at all UNCF institutions.

✔ Over 62,000 applications for admission to UNCF institutions were received for the 1993 term. Applications have increased 72 percent since 1986. About 60 percent of all applications were accepted. Of those admitted, 39 percent chose to enroll.

✔ Some 6,709 bachelor's degrees were awarded by UNCF institutions in 1992-93; this was an increase of 13.5 percent over the previous year and a 36 percent increase since 1989. Other degrees: master's, 437; professional, 184; and doctoral, 43.

✔ Business and management was again the field with the largest number of bachelor's degree graduates in 1992-93. Although business and management continues to lead other fields by a considerable margin, its percentage of the total has been slowly dropping over the past three years.

✔ The field of education showed a 15 percent one-year rise in the number of graduates. Since 1990-91, the field of education has shown an impressive 58 percent gain in the number of graduates.

✔ In fall 1993, the average faculty salary (for all ranks) at UNCF institutions, $28,970, was only two-thirds as high as the $44,080 found at all private baccalaureate institutions.

✔ Faculty salaries at UNCF institutions grew by 3.0 percent during the past year, almost matching the 3.3 percent increase nationally.

✔ In 1993-94, the percentage of full-time faculty at UNCF institutions who held the doctorate reached an all-time high— 55 percent.

✔ At UNCF colleges, 87 percent of the students received some form of financial aid in fall 1992. Nearly 40 percent of all UNCF students needed total financial assistance.

✔ Although some $291 million was allocated for student financial aid, this amount fell short of the $360 million that would have provided needy students with an adequate amount of financial assistance.

✔ Because of the growing financial needs of students, UNCF colleges have dramatically increased the proportion of their operating funds allocated to student aid. Student aid has risen from 12 percent (in 1985-86) to 19 percent of the operating budgets at UNCF institutions.

✔ In 1993-94, the $5,441 average cost of tuition and fees at UNCF colleges was less than half the $11,025 average charged by private colleges nationally.

✔ The average overall institutional cost of attending a UNCF college in 1993-94 rose by less than $450 over the previous year—from $8,699 to $9,197.

✔ Endowment funds at UNCF colleges have increased 179 percent during the past nine years. The market value of these funds increased from $190 million in 1983-84 to $530 million in 1992-93.

INTRODUCTION

This 1994 UNCF Statistical Report presents detailed information concerning the member institutions of the United Negro College Fund. These colleges are a part of a group of 105 historically black colleges and universities (HBCUs); together, these institutions constitute only about three percent of all colleges and universities in the United States, but they graduate over a quarter of all African-Americans who earn the baccalaureate degree and nearly 40 percent of African-Americans who later earn a doctoral degree. Of the 48 privately supported HBCUs, 41 are member institutions of the United Negro College Fund.

With few exceptions, most UNCF member institutions were founded by religious societies from the North during the 35-year period following the Civil War. All UNCF institutions are accredited by appropriate regional accrediting associations. Located principally in the Southeast and in eastern Texas, these institutions operate with a variety of organizational structures and program offerings. While most of the institutions offer baccalaureate programs exclusively, Clark Atlanta, LeMoyne-Owen, Livingstone, Tuskegee, Virginia Union, and Xavier offer graduate/professional programs in addition to their undergraduate curricula. The Interdenominational Theological Center, a specialized professional institution, provides programs of study at the master's and doctoral levels.

The United Negro College Fund was founded in 1944 by Dr. Frederick D. Patterson (of Tuskegee Institute) and 27 other college presidents, who were convinced that private, historically black colleges should bind together for their mutual benefit. Dr. Patterson's vision was vindicated during its first year of operation when the UNCF raised more than three times the amount the colleges had raised individually in the prior year.

The UNCF member institutions have made great contributions to the education of minority students over the past century. The list of distinguished graduates from UNCF colleges includes civil rights leaders, political leaders, religious leaders, educators, scientists, lawyers, and physicians. Four UNCF colleges consistently rank among the top ten institutions in the country in supplying black applicants for medical schools.

Data for the report was generally obtained from the annual UNCF Questionnaire completed by college administrators during the 1993-94 academic year. Data regarding freshman characteristics was obtained from the 1993 report of the Cooperative Institutional Research Program: *The American Freshman*. Data concerning 1994 fall enrollments was obtained from a telephone survey of UNCF registrars in early November 1994.

ENROLLMENT

Preliminary fall 1994 enrollment figures show that 54,098 students were registered at the 41 member institutions of the United Negro College Fund (UNCF). This is the second consecutive year in which enrollments have topped 54,000. Although the fall 1994 figure is slightly less that the record figure for fall 1993, the figure is 27 percent larger than the number enrolled in 1986. Since 1986, enrollment increases at UNCF colleges have averaged about three percent per year.

During the one-year period between 1993 and 1994, enrollment gains were posted by 20 of the 41 UNCF institutions. The largest numerical gain was recorded by Benedict (SC) College. Benedict increased its enrollment by 235 students during the one-year period—from 1,266 to 1,501. The largest percentage increase was found at Livingstone College; Livingstone's enrollment jumped by 23 percent—from 632 to 779. Two other institutions, Miles College and Bethune-Cookman College, increased their enrollments by 135 students. Clark Atlanta University continues to lead all UNCF institutions in enrollment; Clark Atlanta's fall 1994 enrollment was a record 5,148 students, the largest ever recorded by a UNCF institution. Shown below are the UNCF institutions with 1994 enrollments of 1,800 or more.

Clark Atlanta	5,148
Xavier	3,486
Tuskegee	3,401
Morehouse	2,990
Shaw	2,388
Bethune-Cookman	2,345
Spelman	1,974
Morris Brown	1,879

TABLE 1.

Total Enrollments at UNCF
Member Institutions 1986-1994

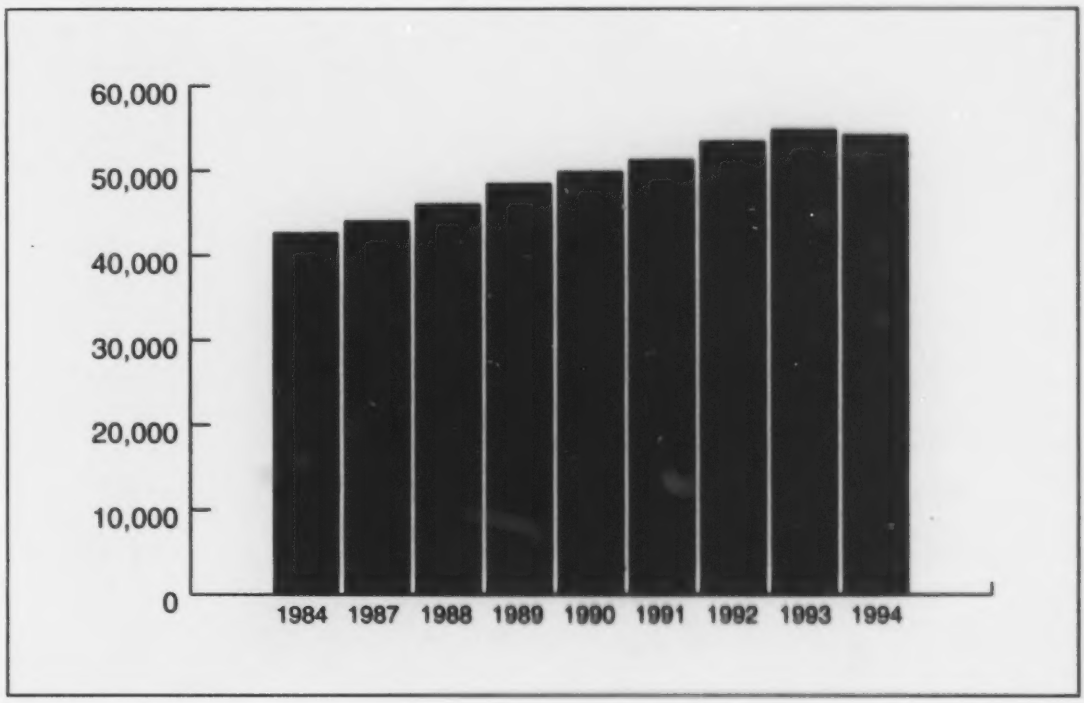
	Enrollment	Percent Increase Over Previous Year	Percent Increase Since 1986
1986	**42,613**	**—**	**—**
1987	**43,984**	**3.2**	**3.2**
1988	**45,987**	**4.6**	**7.9**
1989	**48,396**	**5.2**	**13.6**
1990	**49,816**	**2.9**	**16.9**
1991	**51,181**	**2.0**	**20.1**
1992	**53,363**	**4.2**	**25.2**
1993	**54,730**	**2.6**	**28.4**
1994	**54,098**	**(1.2)**	**27.0**

Corrected figures for fall 1993 show that a record total of 54,730 students were registered at that time. (This is a slight increase over the preliminary number reported in the 1993 Statistical Report.) The increase in enrollment at UNCF colleges and universities comes during a period in which the overall enrollment in higher education in the United States has reached a plateau.[1] The 1993 enrollment figure continues a pattern of gains that have characterized UNCF colleges and universities since 1986. Between 1986 and 1992, (the latest year for which comparative data are available), enrollments at UNCF institutions have risen by more than 25 percent; during this period the rate of gain at UNCF institutions has been almost three times as high as the 9.6 rate of whites at all U.S. colleges and universities and almost twice as high as the 13.8 percent increase at all U.S. colleges and universities. *See Table 1 and Figure 1.*

ber of African-American high school graduates among the 18-24-year-old population stood at 2.88 million; in 1992, this number had dropped to 2.62 million, a nine percent decline. Offsetting the decline in the number of African-American high school graduates was a large increase in the proportion of these graduates who went on to college; between 1984 and 1992, the percentage of African-American high school graduates who enrolled in college increased from 27.2 to 33.8.

The enrollment gains at UNCF institutions have been impressive in recent years and are indicative of a resurgence in college attendance by African-Americans. After several years of decline during the early '80s, African-American proportional representation in U. S. colleges and universities has increased in recent years. Although the gains in enrollment have been significant, African-Americans still constitute but 9.6

FIGURE 1.
UNCF Enrollments
By Year Since 1986



Appendix A shows the total fall (head count) enrollments at each UNCF member institution from 1989 through 1994.

The tremendous gains in UNCF enrollments come at a time when the number of African-American students graduating from public high schools has been declining. In 1984, the num-

percent of the total U.S. college enrollments even though they constitute 14.5 percent of the college-age population in the U.S. (African-Americans constitute 10.2 percent of the total undergraduate enrollments in the U.S.) To achieve equity, the college enrollments of African-Americans should be increased by about one-third. ***See Table 2.***

1 Unpublished U.S. Dept of Education data show that overall 1993 higher education enrollments were slightly below those of 1992.

TABLE 2.

African-American Proportional Representation in U. S. Colleges 1980—1992

	African-Americans as a Percent of College-Age (18-24) Population	African-Americans as a Percent of U. S. College Enrollment
1980	12.8	9.2
1982	13.4	8.9
1984	13.8	8.8
1986	13.8	8.7
1988	13.9	8.7
1990	14.2	9.0
1991	14.3	9.3
1992	14.5	9.6

Full-time and Part-time Students

In fall 1993, most students at UNCF colleges were full-time students. Of the 54,730 enrolled students, 50,195 (92 percent) were classified as full-time. Almost half the 41 UNCF member colleges show enrollments that are composed almost exclusively—95 percent or more—of full-time students. In contrast to the high proportion of UNCF students who are classified as full-time, recent U.S. Department of Education figures show that nationally only 59 percent of the undergraduate enrollment is classified as full-time. Appendix B shows the numbers and percentages of each college's full-time and part-time students.

Classification

Of the total fall 1993 enrollment of 54,730, some 20,943 (38 percent) were classified as freshmen.[2] Compared to fall 1992, the percentage of students classified as freshmen decreased significantly—from 41 percent to 38 percent. Such a decrease strongly suggests that UNCF colleges are retaining a higher proportion of their entering students. Some 10,999 (19 percent) were classified as sophomores; 8,824 (16 percent) were juniors; and 8,613 (16 percent) were seniors. Five percent of the enrolled students were classified as graduate or professional students and another five percent were classified as either "special" or "other" students. The UNCF institutions that offer graduate/professional studies include Clark Atlanta University, Fisk University, the Interdenominational Theological Center, LeMoyne-Owen College, Livingstone College, Tuskegee University, Virginia Union University, and Xavier University. Appendix C provides the institutional enrollment breakdown by classification.

Racial/Ethnic/Citizenship Background

Some 96 percent (52,324) of the students at UNCF institutions in fall 1993 were African-Americans. The largest group of students who were not African-Americans were the 910 non-resident aliens; these students constituted 1.6 percent of the total; the largest numbers of non-resident aliens were found at Clark Atlanta University, Florida Memorial College, Morehouse College, and Oakwood College. The 852 white students on UNCF campuses constituted 1.5 percent of the total enrollment; three UNCF institutions—Shaw University, Tuskegee University, and Xavier University—each enrolled 100 or more white students. The number of Hispanic students increased slightly during the past year—from 279 to 282; the largest numbers of Hispanic students were found at Florida Memorial College and Tuskegee University. The largest contingents of Asian-American students were found at Philander Smith College and at Xavier University.

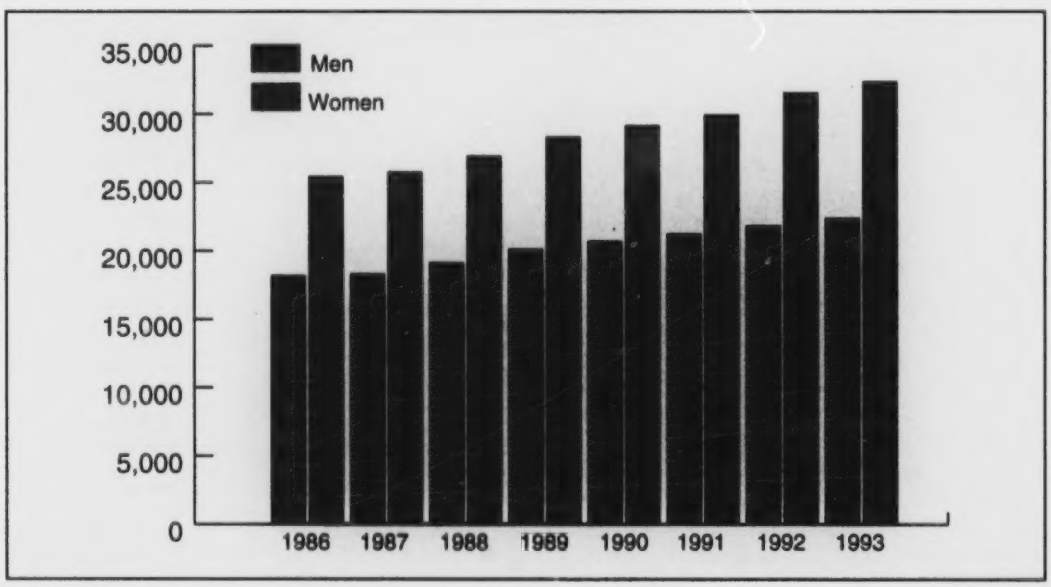
2 The freshman classification included new students as well as some returning students who had not accumulated enough credits to be classified as sophomores.

Gender

Women outnumber men by a considerable margin at UNCF institutions. In fall 1993, women constituted 59 percent of the total enrollment at UNCF institutions while men constituted but 41 percent of the total. As shown in Figure 2, the enrollment of women rose from 25,413 in 1986 to 32,354 in 1993—a 27 percent gain—while the enrollment of men rose from 18,148 to 21,821—a 23 percent increase. During the years shown in Figure 2, the proportion of men and women at UNCF colleges has remained rather constant.

Three UNCF institutions are single-sex institutions: Bennett and Spelman for women and Morehouse for men. Excluding the single-sex institutions, only four UNCF institutions—the Interdenominational Theological Center, Knoxville College, Livingstone College, and Texas College—report enrollments showing men in the majority. Again excluding the single-sex institutions, seven colleges had enrollments wherein women constituted at least two-thirds of the enrollment: Clark Atlanta University, Dillard University, Fisk University, LeMoyne-Owen College, Paine College, Stillman College, and Xavier University. See Appendix F.

FIGURE 2.
Enrollment by Gender
UNCF Students, 1986-1993



Geographic Diversity

Over the past decade UNCF member institutions have demonstrated that they can attract students from throughout the United States. Also, students come to UNCF institutions from a number of foreign countries. Table 3 (on the following page) shows the 15 states sending the largest contingents of students for the years 1983, 1991, 1992, and 1993. (These states include eleven of the twelve states in which UNCF institutions are located, plus California, Illinois, Michigan, and New York.) The table shows the percentage increase between 1983 and 1993 and also between the last two years—1992 and 1993. Note that although Georgia continues to lead in the number of students sent to UNCF institutions, California has posted the largest percentage increase of any state during the past ten years. In fact, California's numbers increased by more than two and one-half times during the decade. Keeping in mind that the overall increase in UNCF enrollments during the 1983-93 decade was about 25 percent, the reader will note that the states of Louisiana, Mississippi, and Ohio (in addition to California) showed percentage gains more than double this overall rate.

TABLE 3.

States Sending Largest Numbers of Students
to UNCF Institutions 1983, 1991, 1992, and 1993

	1983	1991	1992	1993	% Change '83 to '93	% Change '92 to '93
Alabama	3,056	3,068	3,297	3,530	16	7
California	733	1,562	1,755	2,028	176	16
Florida	3,781	4,852	5,008	4,942	31	(1)
Georgia	5,460	5,560	6,067	6,114	12	1
Illinois	1,445	2,013	1,945	1,999	38	3
Louisiana	2,344	3,470	3,441	3,630	55	5
Michigan	1,025	1,505	1,437	1,459	42	2
Mississippi	1,457	2,199	2,434	2,421	66	(1)
New York	1,452	1,997	2,139	2,162	27	1
No. Carolina	3,492	4,128	4,358	4,424	27	2
Ohio	772	1,178	1,256	1,237	60	(2)
So. Carolina	3,903	3,999	4,096	4,382	12	7
Tennessee	2,051	2,306	2,335	2,668	30	14
Texas	2,214	3,019	3,116	2,828	27	(9)
Virginia	1,803	1,714	1,861	1,994	11	7

Table 4 and Figure 3 show the enrollments by the four principal regions of the United States.[3] Figure 3 graphically shows that the Southeast contributes about two-thirds of all UNCF enrollments and that the other three regions contribute about equal percentages.

FIGURE 3.

Geographic Origin
UNCF Students, Fall 1993

3 The regional classification employed in this report divides the United States into four regions: Northeast—the New England states plus New York, New Jersey, Delaware, Pennsylvania, Maryland, the District of Columbia, and West Virginia. Southeast—Virginia through Louisiana and Arkansas. Central—the midwestern states extending from Ohio in the east to the Dakotas in the west and south through Kansas, and the West, including Texas and Oklahoma and all other states to the west.

BEST COPY AVAILABLE

Table 4 shows that although the Southeast still sends two-thirds of the students to UNCF institutions, the other regions of the United States have shown greater percentage gains. The West, largely because of California enrollments, has seen its proportional share of total UNCF enrollments rise from eight percent to ten percent while the number of students coming from this region since 1986 has increased 66 percent.

TABLE 4.

Regional Gains in Enrollment, 1986 to 1993

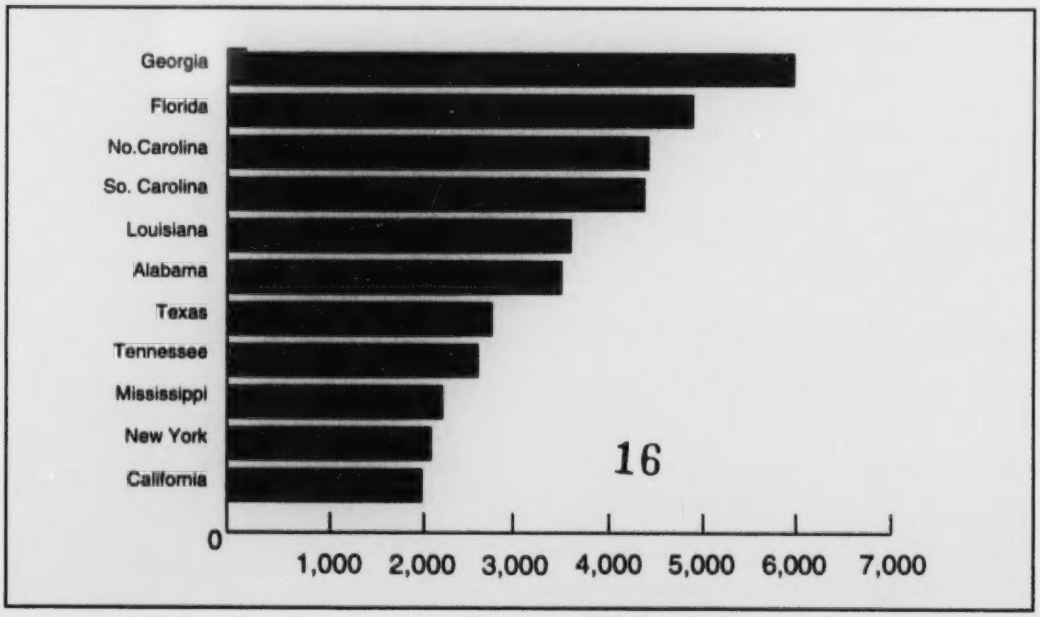
	1986		1993		Increase 1986-1993	
Region	No.	% of Total	No.	% of Total	No.	%
Northeast	4,254	10	6,187	12	1,933	45
Southeast	28,669	70	35,109	66	6,440	22
Central	4,703	12	6,115	12	1,412	30
West	3,199	8	5,322	10	2,123	66

Figure 4 shows the eleven states which sent the largest numbers of students to UNCF colleges in 1993. Note that two of the states, New York and California, are outside the South. Appendix G shows the state-by-state origin of UNCF students at each of the member institutions.

Atlanta, with 2,511 students of origin, continues to send more students to UNCF colleges than any other city. Cities which sent at least 1,000 students to UNCF colleges in 1993 included Birmingham, Chicago, Memphis, New York City, and New Orleans. New York City posted a one-year gain of 27 percent—from 985 students in 1992 to 1,253 students in 1993. Among the cities providing fewer than 1,000 students, Richmond (Virginia) showed a 76 percent gain—from 352 to 621, while Raleigh (No. Carolina) showed a 33 percent gain. The complete listing of principal UNCF campaign cities, and the number of students sent from each, is shown in Appendix H.

FIGURE 4.

Enrollments from States
UNCF Students, Fall 1993



APPLICATION PROCESS

Applications for places in the freshman classes of UNCF institutions continue to increase in record numbers. For the fall 1993 term, a record number of 62,162 applications were received. Since 1986, applications have increased by some 72 percent. Clark Atlanta University, with a total of 8,478 applications received, again led the UNCF member institutions in this respect. Other UNCF institutions that recorded over 3,000 applications included Florida Memorial, Morehouse, St. Augustine's, and Spelman.

Although the number of applications has been growing steadily, many UNCF institutions have been unable to admit larger numbers because of limited financial aid funds and limited student housing. Some UNCF institutions continue to offer admission to all applicants who are high school graduates, but a growing number have become more selective in the admissions process; overall, 59 percent of the freshman applicants were offered admission at UNCF institutions for the fall of 1993. The acceptance rate for applicants was nine percentage points lower than the rate recorded in 1992 and 20 points lower than the figure for 1989. A number of UNCF colleges showed admissions acceptance rates in 1992 that were highly selective: Spelman, 33 percent; Barber-Scotia and Shaw, 37 percent; and Florida Memorial, 39 percent. Because of the more stringent admissions standards, the number of students actually admitted for fall 1993 was slightly lower than in the prior year even though the number of applications reached a record high.

The number of students actually enrolling has not been keeping pace with the number of applications or the number of students admitted. Although the number of new freshman enrollees has increased by 17.5 percent since 1986 (from 12,116 to 14,238), the percentage of admitted students who later enroll has been declining. In 1987, 48 percent of the admitted freshmen actually enrolled, but, in 1993, this percentage had dropped to 39. Such figures suggest that students are facing severe financial difficulties and that many can not find the funds to enroll even though they have met the colleges' admissions criteria.

Table 5 below and Figure 5 on the next page show data concerning the admissions process for the seven-year period beginning in 1986. Appendix I shows data for individual UNCF institutions for fall 1993.

TABLE 5.

Freshman Applications, Admissions and Enrollment at UNCF Institutions, 1986—1993

Year	Completed Applications	No. Offered Admission	Percent of Applicants Admitted	No. Enrolled	Percent Enrolled
1986	36,199	25,865	71	12,116	47
1987	38,973	27,439	70	13,060	48
1988	44,783	30,376	68	13,617	45
1989	43,799	34,453	79	14,394	42
1990	48,195	33,129	69	13,930	42

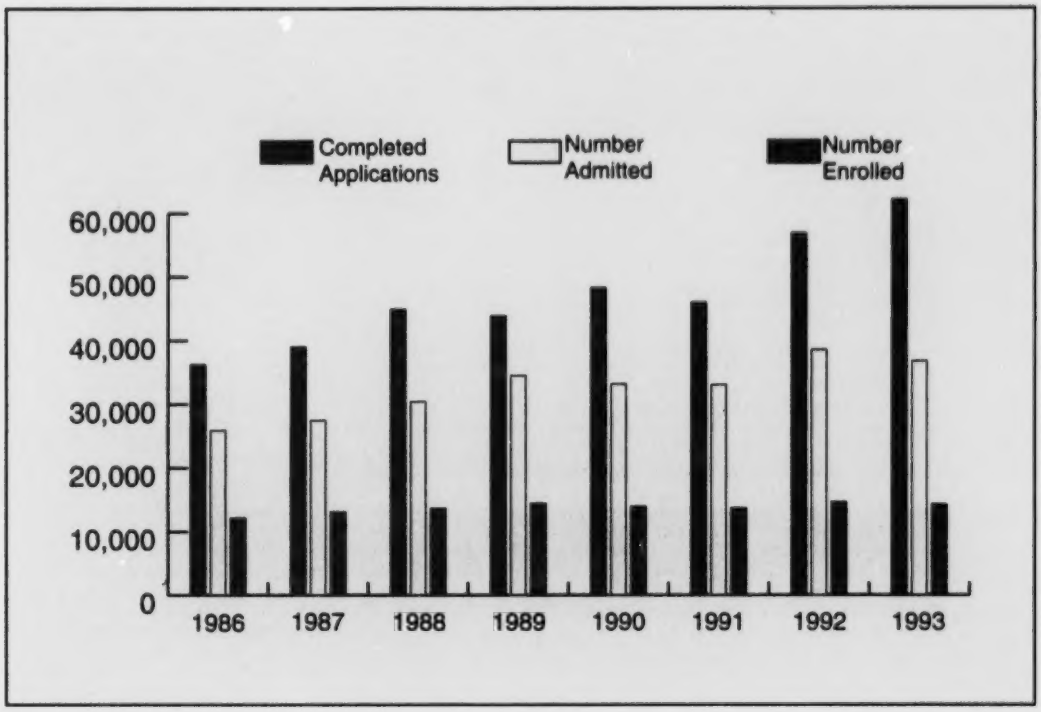
FIGURE 5.

Admissions Process
UNCF Institutions 1986-1993



Characteristics of Incoming Freshmen

Because private black colleges participated in the annual freshman survey conducted by the Cooperative Institutional Research Program (CIRP)[4], it was possible to get a good description of UNCF students and to compare them with students at other private four-year colleges. The following descriptive data is derived from the responses of 4,347 freshmen who entered 12 private historically black colleges in fall 1993; most of these students attended UNCF institutions.

✔ 42 percent reported that they had a B+ or better average in high school; over the past four years, the percentage of UNCF entering freshmen with B+ or better averages has increased substantially-from 28 percent to the current 42 percent.

✔ UNCF colleges, in contrast to other four-year colleges, draw students from greater distances; 43 percent of the entering freshmen traveled more than 500 miles to attend a UNCF college; in comparison, only 13 percent of all private four-year college students traveled such distance.

✔ 37 percent came from families where the estimated parental income was less than $25,000 compared to only 18 percent of the students at all private four-year colleges.

✔ The reported percentage of fathers who were unemployed was more than twice as high at UNCF colleges than at all four-year colleges: eight percent vs. three percent.

✔ Only five percent of the mothers of UNCF students were described as "homemaker"; in contrast, 13 percent of the students at all four-year colleges described their mothers as "homemakers".

✔ Only 46 percent said that they came from a home where both parents were living with each other; 72 percent of the students at all four-year colleges came from such homes.

✔ 49 percent reported their religious affiliation as Baptist; at all four-year colleges the largest religious representation was the 31 percent who identified themselves as Catholic.

4 Astin, A.W., Korn, W.S., & Riggs, E.R., (1993). The American Freshman: National Norms for Fall 1993. Los Angeles: Higher Education Research Institute, UCLA.

✔ 15 percent reported spending sixteen hours or more per week watching TV; seven percent of those entering all four-year colleges reported watching this much TV.

✔ Only five percent of entering UNCF students chose teaching as a probable career occupation; in comparison, 12 percent of the students entering all four-year colleges chose teaching as a probable career.

✔ In contrast to 57 percent of the entering freshmen at all four-year colleges, 77 percent of UNCF entering students said "good academic reputation" was the most important reason for choosing their particular college. Other reasons chosen by the UNCF students were: "graduates get good jobs", 66 percent; "graduates go to top grad schools", 53 percent; "size of college", 43 percent; and "offers special programs", 38 percent.

✔ Students entering UNCF institutions have a high level of aspiration. In comparison with 17 percent at all four-year colleges, more than twice as many of the UNCF freshmen (36 percent) say that they eventually hope to graduate with honors.

✔ About two-thirds (64 percent) of the mothers and over half (56 percent) of the fathers of UNCF students have attended college.

Transfer Students

Appendix E shows the previous college background of the 3,143 students who transferred to UNCF institutions in fall 1993. Of the new students entering UNCF institutions, about one in six was a transfer student. Over half of the new transfer students had previously attended a predominantly white institution.

DEGREES

One of the most encouraging developments at UNCF member institutions has been the substantial increase in the number and percentage of students earning the bachelor's degree. As pointed out in a earlier section of this report, total enrollment at UNCF institutions has shown remarkable growth, but the number of students earning degrees has grown even more dramatically. Between 1989 and 1992, undergraduate enrollment at all UNCF institutions increased from 44,332 to 48,870—a 10.2 percent increase. During this same period, however, the number of students earning a bachelor's degree increased by a much greater rate—35.8 percent. In 1989-90, 11.1 percent of the undergraduate enrollment at UNCF institutions earned bachelor's degrees, but in 1992-93 the number of undergraduates who earned degrees had increased this percentage to 13.7. Nearly two-thirds (63.5 percent) of the bachelor's degrees awarded in 1992-93 were awarded to women.

The large increase in the number of bachelor's degrees awarded indicates that UNCF member colleges are pursuing policies which result in greater numbers of students meeting graduation requirements. Some of this increase in graduation rates may be the result of greater selectivity, but much of the result can be attributed to the efforts of hundreds of dedicated faculty and staff who have worked tirelessly to bring about this result. For example, Stillman College adopted an enrollment management plan in 1985 to increase retention; the plan included a computerized tracking system for each student and improved academic and social counseling. In collaboration with other collegiate institutions, Stillman also sponsored numerous retreats, planning and work sessions to facilitate the professional and personal growth of its administrators, faculty, and staff in the area of student retention.

Since 1989, the rate of increase in awarding bachelor's degrees in various disciplines has shown considerable variation from the overall rate of 35.8. Table 6 shows the number and percentage of graduates by area over this four-year period. The table also shows the percentage increase in the number of graduates between 1989-90 and 1992-93. Note the large percentage increase in psychology, mathematics, education, the life sciences, and the social sciences. The gains in other areas—particularly business, computer science, the health professions, and the physical sciences—have failed to keep pace with the overall rate. Figure 6, shows the four-year increase in the seven largest majors at UNCF colleges between 1990 and 1993: business and management, social sciences and social work, education, biology (life sciences), psychology, the humanities (English, foreign languages, philosophy, and religion) and communications.

Trends in Areas of Study at the Bachelor's Level

In 1992-93, the field of **business and management** was again the largest producer of bachelor's degrees at UNCF institutions. This field includes such areas as accounting, banking and finance, business administration, institutional management, and marketing. With 26 percent of all bachelor's degrees, the field accounted for far more bachelor's degrees than any other field. As shown in Table 6, business and management is still the largest field at UNCF colleges, but its share of the total number of degrees has been steadily dropping for each of the past three years.

The number of degrees in **communications** (mostly journalism) increased slightly in 1992-93 from the previous year. Over the four-year period since 1989-90, the field has shown a 45 percent increase.

Computer science showed a one-year rise of 29 percent in the number of bachelor's degrees awarded—from 202 to 261. Some 64 percent of the graduates in this field were women.

After a number of years of decline in the 80's, the field of **education** has experienced a substantial increase in the number of degrees awarded since 1989-90. Since that year, the number of graduates has increased from 418 to 662—a 58 percent gain. The pattern of increase continued in 1992-93 with another substantial one-year rise of 15 percent. Education now accounts for almost ten percent of all UNCF graduates. In 1992-93, 78 percent of the degrees in this field were awarded to women.

The various fields of study in the **health professions** have shown a 15-percent increase in graduates over the past four years—from 213 to 245. In 1992-93, 72 percent of the graduates in the health professions fields were women.

The percentage of degrees in the **humanities**—English, speech, foreign languages, philosophy, and religion—showed a ten-percent one-year increase—from 354 to 387. About three-quarters of the degrees in the humanities were awarded in the field of English. Relatively few degrees were awarded in foreign languages in 1992-93—five in French and 16 in Spanish; of these 21 degrees in foreign languages, two colleges, Morehouse and Spelman, provided over half the total. The various fields in the humanities accounted for about six percent of all degrees in 1992-93.

The number of degrees in the **life sciences** (mostly biology) rose 32 percent in the one-year period between 1991-92 and 1992-93. Since 1989-90, the number of degrees in this field has risen 59 percent. About 70 percent of the degrees in biology were awarded to women.

Since 1989-90, the number of bachelor's degrees in **mathematics** at UNCF institutions has increased 46 percent. With 30 graduates in 1992-93, Spelman led in the production of math majors. Women accounted for about two-thirds of the graduates in mathematics.

Degrees in the **physical sciences**—chemistry and physics—showed a one-year gain of 23 percent. Last year's increase reverses a two-year trend which had seen the numbers in this area fall below the 1989-90 figure.

Degrees in **protective services** (criminal justice) showed a nine-percent one-year increase—from 211 to 230. This field has shown a 62 percent increase since 1989-90. Contributing to the rise in this field have been a number of innovative programs at several UNCF colleges that focused on such areas as peer mediation and counseling.

Psychology has shown the greatest growth of any field at UNCF institutions. Over the four-year period since 1989-90, the number of degrees awarded in psychology has almost doubled—from 209 to 401. Over three-quarters of the degrees in this field were awarded to women.

Included in the **social sciences** are economics, history, political science, sociology, urban studies, public administration, and social work. With almost 17 percent of the degrees awarded in 1992-93, the social sciences accounted for the second largest number of degrees at UNCF institutions.

The number of degrees in the **visual and performing arts** has shown a 37-percent increase over the past four years; most of this increase came during the past reporting year. Degrees in this area account for about two percent of all degrees at UNCF institutions.

A wide variety of **other areas** accounted for five percent of UNCF bachelor's-degree recipients in 1992-93. Included in these other areas are the dual-degree programs in engineering that are found at 22 UNCF institutions. Since these programs were established, some 665 students have received engineering degrees. See Appendix V. Other unique programs at UNCF institutions include such fields as airway science management, clothing fashion design, restaurant management, hospitality administration, and construction science.

For details of the bachelor's degrees awarded by each UNCF institution, see Appendix R.

Graduate and Professional Degrees

The number of degrees awarded at the graduate/professional level increased 26 percent over the previous year. In 1992-93, UNCF institutions awarded 437 master's degrees, 184 professional degrees, and 43 doctoral degrees. Altogether, 664 degrees were awarded at the graduate/professional level. Seventy of the professional degrees were awarded in theology, while 50 were awarded in veterinary medicine. Of the 43 doctoral degrees, 20 were awarded in education.

Detailed information about advanced degrees is shown in Appendix S and T.

ACADEMIC PREPARATION

As shown graphically in Figure 7, the percentage of full-time faculty members at UNCF institutions who hold the doctoral degree has climbed steadily over the past decade and reached an all-time high of 57 percent in fall 1993. One UNCF institution, the Interdenominational Theological Center, reported that over 90 percent of its faculty now hold the doctorate, while nine other institutions—Clark Atlanta, Fisk, Johnson C. Smith, LeMoyne-Owen, Morehouse, Shaw, Spelman, Tuskegee, and Xavier—reported that two-thirds or more of their full-time faculty have earned the doctorate. The continued steady improvement in the academic development of their full-time faculty has been one of the hallmarks of UNCF institutions. Since 1989-90, 56 faculty members at various UNCF institutions have obtained their doctorates through fellowship programs administered by the United Negro College Fund.

GENDER/RACIAL CHARACTERISTICS

UNCF colleges and universities are models of gender/racial diversity in the composition of their full-time faculties. Although UNCF colleges serve a predominantly black student enrollment, 41 percent of their 3,160 faculty members are nonblack and 39 percent are women. See Table 7 and Figure 8 (on the following page). At nine UNCF institutions—Claflin, Huston-Tillotson, Knoxville, Paine, Rust, St. Paul's, Stillman,Voorhees, and Xavier—nonblack faculty constitute 50 percent or more of the full-time faculty. Women outnumber men at the two women's colleges—Bennett and Spelman. A recent U.S. Department of Education publication, "Faculty and Instructional Staff: Who Are They and What Do They Do?" showed that African-Americans accounted for 25,785 (4.9 percent) of the 526,222 full-time faculty members in the United States in fall 1992.

FIGURE 7.

By Percent and Year Since 1973-74

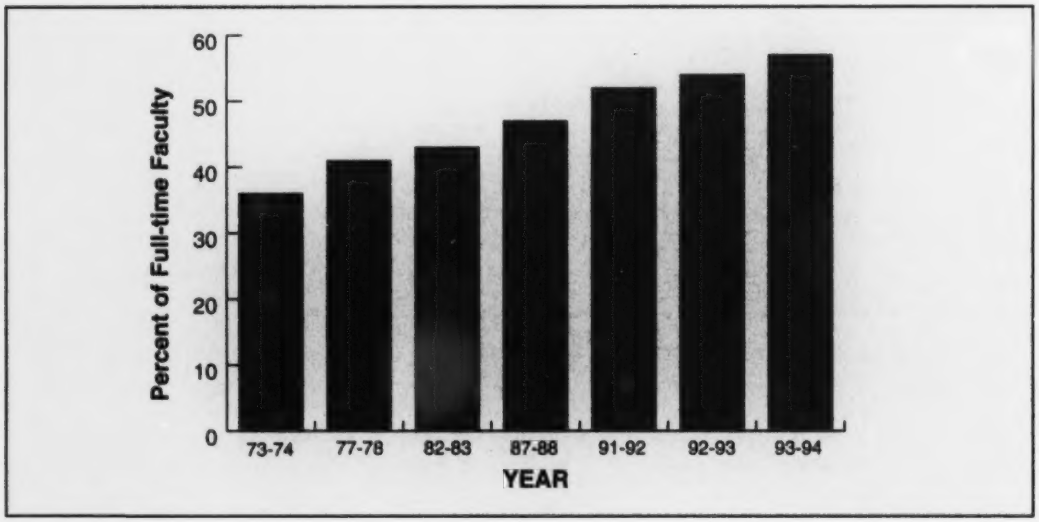

TABLE 7.

Gender/Racial Composition of
Full-time Faculty at UNCF Institutions
Fall 1993

	Male		Female		Total	
	No.	%	No.	%	No.	%
Black	1,04	33	833	26	1,874	59
Nonblack	895	28	391	13	1,286	41
TOTAL	1,936	61	1,224	39	3,160	100

FIGURE 8.

Gender/Racial Composition of Full-time Faculty , UNCF Institutions By Percent, Fall 1993

After subtracting the approximately 12,000 African-Americans who are employed at the 105 historically black colleges and universities, only approximately 14,000 African-Americans are found as faculty members at the other 3,454 collegiate institutions in the United States. Thus, in contrast to the great amount of racial diversity found at UNCF institutions, black faculty members at predominately white institutions constitute only about 2.2 percent of the number of full-time faculty at these institutions. For details of the racial/gender composition at each UNCF college, see Appendix J.

Faculty Salaries

In the academic year 1993-94, the average faculty salary at UNCF member institutions was $28,970. This average salary was only two-thirds the $44,080 average found at all private baccalaureate institutions in the United States in that year. In comparison with salaries at church-related colleges, the average UNCF faculty salary was 80 percent as high.

UNCF faculty salaries are particularly low at the highest academic rank—full professor. The average full professor's salary at a UNCF institution, $34,109, was only 60 percent of the $56,780 average at all private baccalaureate institutions. Unfortunately, the average faculty salary for full professors actually decreased during the past reporting year, from $34,914 to $34,109. Average salaries for the other three academic ranks—associate professor, assistant professor, and instructor—increased at a faster rate than those at other colleges.Shown below in Table 8 are the average salaries for various faculty levels at UNCF institutions, all baccalaureate institutions, and at church-related institutions. Also shown in Table 8 is the one-year percentage increase for each level.

Faculty Distribution by Area

Table 9 shows faculty distribution in various academic areas during four selected years since 1987. Perhaps one of the most striking points in Table 10 is the consistency of the data from year to year; in 1993, UNCF faculties were distributed in almost the same proportion as six years earlier. Although about 30 percent of UNCF students obtain degrees in business, only 11 percent of faculty members are in that area. Since many courses in the business field are courses intended for students who are majoring in a specific field, enrollments in these courses are generally not

TABLE 8.

Computer Science	3	4	3	3

as high as in those courses in the humanities, sciences, and mathematics which are required for all students.

Faculty Turnover and Faculty Tenure

The composition of the faculty at UNCF institutions has been quite stable over the past several years. In 1993-94, for example, only 11 percent of the faculty retired or transferred to other employment, while 14 percent were new appointees. These percentages have changed little over the past several years.

The proportion of the faculty holding tenure has increased somewhat in recent years. For example, in 1980-81, 22 percent of the full-time faculty persons held tenure while in fall 1993, 828 (27 percent) of the 3,160 full-time faculty members held such status. Appendix L shows the faculty turnover and the number and percent of tenured faculty at each institution.

Staff Composition

The number of full-time faculty members increased only slightly during the past year—from 3,039 in 1992 to 3,160 in fall 1993. UNCF colleges have traditionally emphasized their teaching responsibilities and thus a greater proportion of total personnel at UNCF institutions are dedicated to teaching than at most U.S. colleges. In 1993, faculty constituted 31 percent of the total personnel at UNCF institutions as compared to 29 percent at all U.S. colleges.

The number of full-time administrators increased during the year from 2,172 to 2,418, an eleven percent rise. Most of this increase involved adding personnel at the mid-level and "other" administrative levels. These positions include assistant vice-presidents, directors, managers, coordinators, and assistant directors. Administrators accounted for 24 percent of the personnel at UNCF institutions. Nationally, some 27 percent of full-time college and university personnel are administrators.

Despite increases in enrollment, the number of senior administrators has actually declined in the past four years at UNCF institutions—from 327 to 291. By increasing the size of their teaching faculty while paring down the number in top administrative posi-tions, UNCF institutions have emphasized commitment to teaching.

The size of the support staff at UNCF institutions showed a four-percent increase over the past year—from 4,384 to 4,554; support staff constituted 45 percent of the personnel at UNCF institutions.

Table 10 (on the following page) shows the overall staff composition at UNCF colleges during the years 1989-90, 1990-91, and 1991-92. Appendices O and P provide the details of the staff composition at each institution for fall 1993.

STUDENT FINANCIAL AID

THE NEED

Over one-third (37.4 percent) of the students who attended UNCF colleges and universities came from families where total income was less than $25,000 per year.[5] These students and their families can make little or no contribution to the expenses of attending college. Although students come to UNCF colleges from a wide range of family income backgrounds, the largest concentration is at the low end of the distribution. See Figure 9 below. Because of the severe financial need of so many students, fully 85 percent of all UNCF students received some form of financial assistance. In comparison, less than half as many (18.5 percent) of the students attending private colleges nationally in 1993 came from such low-income families. In 1993, the median family income of students attending private black four-year colleges (the group which includes most UNCF member institutions) stood at only $34,700; the median for families of all private college students was $53,523. While about half of all four-year col-

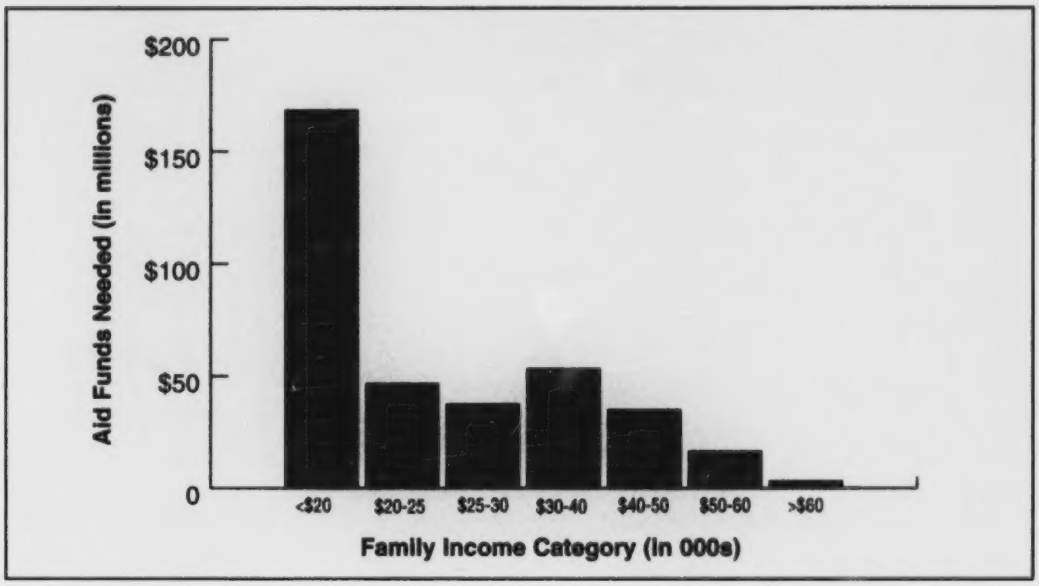
FIGURE 10.
Total Aid Needed
UNCF Students, Fall 1992



lege students come from families with incomes over $50,000, only about one-third of all UNCF students come from such families.

An analysis of the financial aid needs of students from various family-income categories is shown in Table 11. Table 11 shows the percentage of UNCF students coming from each family-income category, the expected amount of contribution from the family toward college expense, and the total amount of aid need needed by students from a particular income category. In calculating the amount of need, the table assumes that the average full cost of attending a UNCF institution in 1992-93 was $10,890 ($5440 for tuition and fees; $3200 for room and board; $1700 for personal expenses and transportation; and $550 for books and supplies.) Based on this average cost of $10,890, the table shows the amount for each income category that could reasonably be expected to come from the family and the amount that would have to come from other sources—generally financial aid.

Table 11 also shows that the total amount of aid funds needed by students at UNCF institutions in 1992-93 was over $360 million. Because of the inadequacy of the various financial aid programs, UNCF colleges and their students faced a financial aid shortage of some $69 million. This shortfall in aid funds meant that many needy students were unable to buy necessary supplies or were unable to participate fully in extracurricular activities, which are an important part of college life; many, unfortunately, were forced to drop out of college because of the lack of funds.

Table 11 shows that middle-income families—as well as low-income families—face great difficulties in financing a college education for their sons or daughters. Even a family in the $40,000 to $50,000 income range needs an average of nearly $6,000 per year in student financial aid funds in order to meet the average costs at UNCF institutions. Note that the average amount of need as shown in the above table is $6,751, a one-year increase of $400. This calculation uses all students; if the calculation considered only those students coming from families with less than $60,000 income, then the average need of this group would be $8,914.

Figure 10 shows the total need, in millions of dollars, of students coming to UNCF colleges from various family-income categories. Note that the total need for students from the lowest income category was nearly $170 million.

Current Student Aid Resources

Table 12 shows that the total amount of student aid funds awarded by the colleges was only $291 million in 1992-93—$69 million less than the $360 million that would have provided funds to support all needy students. The $291 million was an increase of seven percent over the $245 million allocated for financial aid in the previous year.

TABLE 12.

Financial Aid by Category, 1992-93

Type of Aid	No. of Students	Percent of All UNCF Students	Total Award (in 000s)	% of Aid $$s	Avg. Grant/ Loan
Pell Grant	33,195	65	$ 59,321	20	$ 1,787
SEOG	15,977	31	$ 15,083	5	$ 943
College Work-Study	12,633	25	$ 15,307	5	$ 1,212
Stafford Loans (GSL's)	32,853	64	$ 89,453	31	$ 2,722

Other Scholar-ships/Grants	6,935	14	$ 14,264	5	$ 2,056
PLUS Loans	7,064	14	$ 22,018	8	$ 3,117
SLS Loans	3,389	7	$ 8,816	3	$ 2,610
College and/ or other Loans	806	2	$ 1,352	<1	$ 1,677
TOTAL			$290,857		

With respect to dollars, the largest single aid program at over $89 million was the Stafford Loan program. The Pell Grant program, which provided awards to two-thirds of all UNCF students, served the greatest number of students. In terms of the average size of award, the ROTC scholarship program with an average award of $6,315 was by far the most generous, but this program provided awards to less than one percent of all UNCF students. Table 12 shows the details of the main financial aid programs reported by the colleges.

Trends in Student Financial Aid

Tables 13A, 13B, and 13C below highlight the trends of the six largest student-aid programs at UNCF institutions over the past five years. The tables show that Federal student-aid programs have failed to keep pace with enrollment increases and annual cost of living increases and that the colleges themselves have had to supply increasing amounts of aid funds.

FIGURE 11.

Students Receiving Aid
Total Number by Program & Year

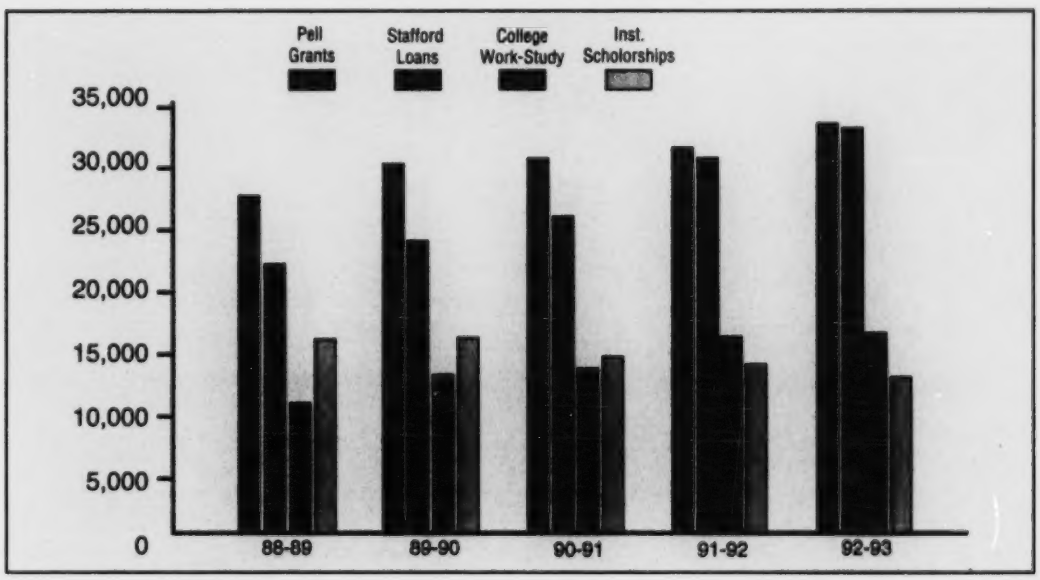

Table 13A relates to the number of students who received assistance during the five-year period between 1988-89 and 1992-93. During this period, the Stafford Loan program and institutional scholarships showed the greatest growth in the number of students served. The Stafford Loan program grew over 50 percent during this period and institutional scholarships showed a substantial 27 percent gain. On the other hand, despite an enrollment increase of 16 percent during this period, the Federal campus-based aid programs—particularly the college work-study program—failed to keep pace with the number of students needing financial assistance.

Figure 11 shows the number of students receiving aid through the major aid programs during the five-year period 1988-89 through 1992-93. Note the large growth in the Stafford Loan program and the institutional scholarships programs. The Pell Grant program,

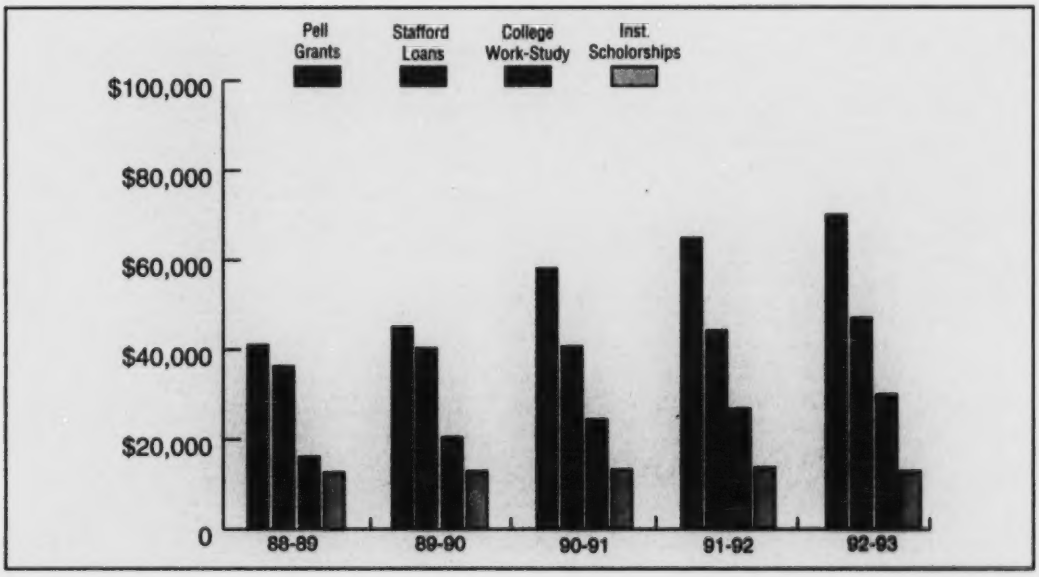
Amount Of Student Aid
Total Number by Program & Year



although the largest in terms of the number of students served, has not pace with enrollment increases.

Table 13B, which details the amount of funds expended for various programs, also shows that the Stafford Loan program and institutional scholarship programs carried out by the colleges themselves were the only aid programs to expand in real dollars during the past four years. In analyzing the data in Table 13B, it is important to remember that UNCF enrollments grew 16 percent during the period and that the value of the dollar declined by about three and one-half percent a year due to the annual increase in the Consumer Price Index (CPI). Except for the Stafford Loan program and institutional scholarships, the other major pro-

TABLE 13C.

Inst. Scholarships	1,803	1,934	2,300	2,350	2,292	27.1

grams—Pell Grants, college work-study program, SEOG, and state scholarships—failed to keep pace with a rising CPI and the student enrollment increases. It is clear that the Federal government's emphasis on loans as its primary means of supporting needy students has had great impact on UNCF students and their families.

The rapid rise of the Stafford Loan program in contrast to the sluggishness of other major aid programs is shown in Figure 12.

Changes in the average awards during the past four years are shown in Table 13C. (With an annual inflationary rise of approximately three and one-half percent, the percent increase in those programs should have been around 12 percent in order to keep pace with the CPI.) Three programs—the Stafford Loan program, institutional scholarships, and the college work-study program—have kept pace with inflationary increases, but the other three major programs have not sufficiently increased their average awards to compensate for the rising cost of attending college. The college work-study program has increased by the largest amount, but the number of students participating in this program has declined.

College Costs

In 1993-94, the cost of attending a UNCF member institution remained less than half that of attending other private four-year colleges and universities in the United States. The data shown graphically in Figure 13 below compares expenses at UNCF institutions with expenses at all private colleges in the United States and with private colleges in the South. For details of the costs at each UNCF college, see Appendix X.

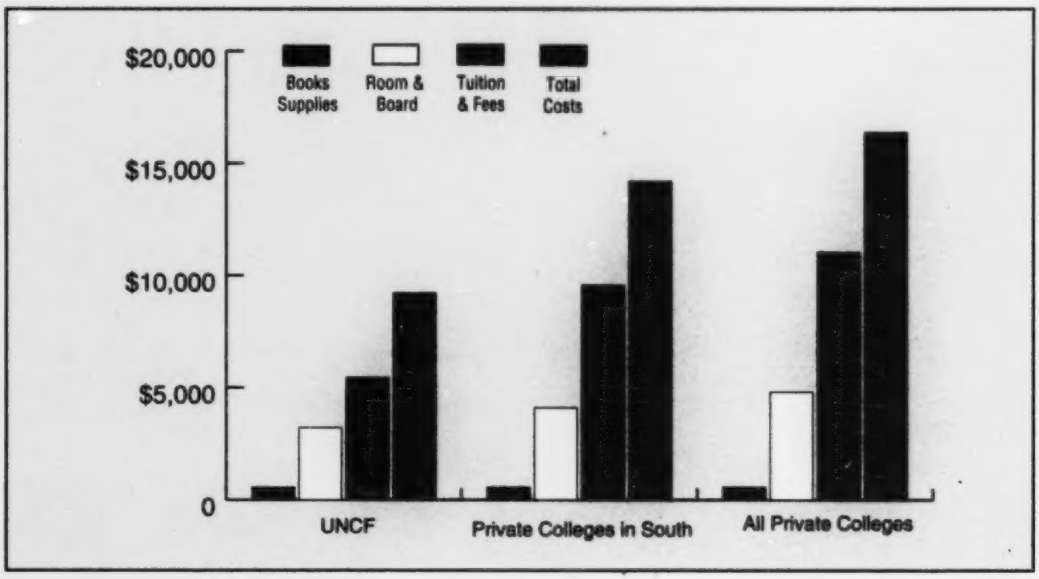
From 1992-93 to 1993-94, the average cost of tuition and fees at UNCF colleges rose from $5,088 to $5,441, an increase of $353 or 6.9 percent. This average increase of $353 at UNCF institutions was much less than the increase of $527 at all four-year colleges or the $545 increase at private colleges in the South. Despite the increase in charges, the UNCF average charge for tuition and fees remains less than half that charged by private colleges nationally ($11,025) and 43 percent less than the $9,541 charged by Southern private 4-year colleges.

Average room and board charges at UNCF colleges rose 4.7 percent over the previous year—from $3,061 to $3,206. Compared to private colleges nationally, the charges for room and board for a typical UNCF student living on campus were one-third less; in relation to Southern private colleges, UNCF colleges charged 22 percent less.

The average cost of books and supplies at UNCF institutions showed no change from the previous year and remained at $550. The cost of books and supplies was approximately the same at all four-year colleges.

The average institutional costs (tuition and fees, room and board, and books and supplies) of attending a UNCF college in 1993-94 rose by less than $450 over the previous year—from $8,699 to $9,197, a 5.7 percent rise. When compared with the average national private college cost of $15,604 and the average private Southern four-year college cost of $13,436, the average basic cost at UNCF institutions was considerably less. By keeping their costs relatively low, UNCF institutions continue to give thousands of students the opportunity to attend a quality four-year private college.

FIGURE 13.
Basic Costs 1993-94
UNCF Institutions & Other Private Colleges



INSTITUTIONAL FINANCES

For the fiscal year ending June 30, 1993, the member institutions reported revenue and expenditure figures that each averaged nearly $18.3 million. In comparison with figures for 1991-92, average revenues for 1992-93 increased 6.6 percent while average expenditures increased 8.0 percent. Twenty-nine (nearly three-quarters) of the 41 member UNCF institutions reported revenues which exceeded expenditures; as recently as 1985-86, only 58 percent of UNCF institutions could report that their revenues exceeded expenditures.

REVENUES

Revenues continue to be derived from three main sources: student tuition and fees, government, and private gifts and grants. Those three sources accounted for 82 percent of all revenues in 1992-93. As shown in Table 14 below, tuition and fees has dropped slightly as a source of revenue since 1984. The percentage from government has increased from 20 percent in 1985-86 to 28 percent in 1991-92. The proportion of UNCF colleges' revenues coming from private gifts and grants has fluctuated between 17 and 20 percent since 1985-86; in 1990-91, 18 percent came from this source.

Much of the revenue derived from government is in the form of grant funds restricted for student financial aid. Funds for campus-based Federal student aid programs would be an example of this kind of income. (Pell grants go to the students and then the students use this grant money to pay their tuition and fees and other expenses; Pell grants do not go directly to the college.) Other significant amounts of government revenues come from Title III of the Higher Education Act of 1965; except for the Interdenominational Theological Center, all UNCF institutions

derive at least $500,000 per year from this source. A third major part of government funds support research contract activities carried out by the colleges.

Alumni support accounted for nearly $10 million in private gift and grant contributions during 1992-93. Appendix AA shows that of the 248,848 living alumni of UNCF institutions, over 35,000 (fourteen percent) made a financial contribution during the year. Altogether, their contributions averaged nearly $274 per contributor.

The funds derived from auxiliary enterprises are chiefly those associated with the operation of college cafeterias and dormitories. Typically, operation of these facilities results in a small net profit for the institution. (In 1991-92, some 13 percent of the revenues came from auxiliary enterprises, while only 10 percent of the colleges' expenditures were used to cover operating costs associated with these activities.)

In comparison to the above data, Table 15 shows the latest available U. S. Department of Education figures (1991-92)[6] for private institutions of higher education in the United States. (The table excludes revenues for federally financed research-and-development centers and revenues received in conjunction with the operation of university hospitals.)

A comparison of the sources of revenues of UNCF institutions and those of other private colleges shows that other private colleges derive almost half of their revenues from tuition and fees; at UNCF colleges, tuition and fees account for only about one-third of operating revenues. Since UNCF institutions derive a much smaller proportion of their revenues from tuition and fees than do other private colleges, part of the challenge of the mission of the United Negro College Fund is to bridge this gap. The data also show that the UNCF institutions rely more on private gifts and grants than other private institutions for obtaining crucial operating funds; 18 percent of UNCF revenues come from gifts and grants as opposed to only ten percent at all private institutions. The revenues obtained by UNCF institutions from government sources come primarily from the federal government and are generally restricted for use for student aid and for programs through Title III of the Higher Education Act; UNCF colleges receive little or no support from state or local governments.

EXPENDITURES

A significant financial development has been the rapid rise in the proportion of institutional funds that must be spent for student financial aid. As shown in Table 16, student aid now accounts for 20 percent of all expenditures at UNCF institutions. In comparison, Table 17 shows that other private colleges spend only twelve percent of their operating budget for student aid.

The pattern of expenditures (in terms of percentage of total expenditures) at UNCF institutions has changed little during the last three reporting years. Instructional costs and student aid continue as the two most costly expenditures for UNCF institutions. It is significant that student aid expenditures at UNCF institutions are almost as high as the cost of instruction. UNCF institutions have had to spend larger and larger portions of their budgets on student aid because of the serious financial needs of their students and, in fact, at 19 UNCF institutions, student aid—in comparison to instructional costs—now takes a greater portion of the budget.

Other expenditures also showed little change from those reported in prior years. Institutional support (general administration, the business office, and the registrar's office) accounted for 18 percent. Academic support, (e.g., computer assisted instruction, the library, and the developmental programs) accounted for six percent. Maintenance of the physical plant required ten percent while the costs associated with auxiliary enterprises (the book store, cafeterias, and dormitories) accounted for 11 percent of the colleges' budgets.

In comparison, Table 17 shows the latest available U. S. Department of Education figures (1991-92)[7] for expenditures at private colleges and universities in the United States. (Expenditures for the operation of federally funded research-and-development centers and university hospitals are excluded.) UNCF colleges spend a far larger proportion of their operating funds on student aid than do other private colleges and universities. Details of each college's sources of revenues and categories of expenditures are shown in Appendix Z and Appendix BB. The total revenues and expenditures for each college are shown in Appendix Y.

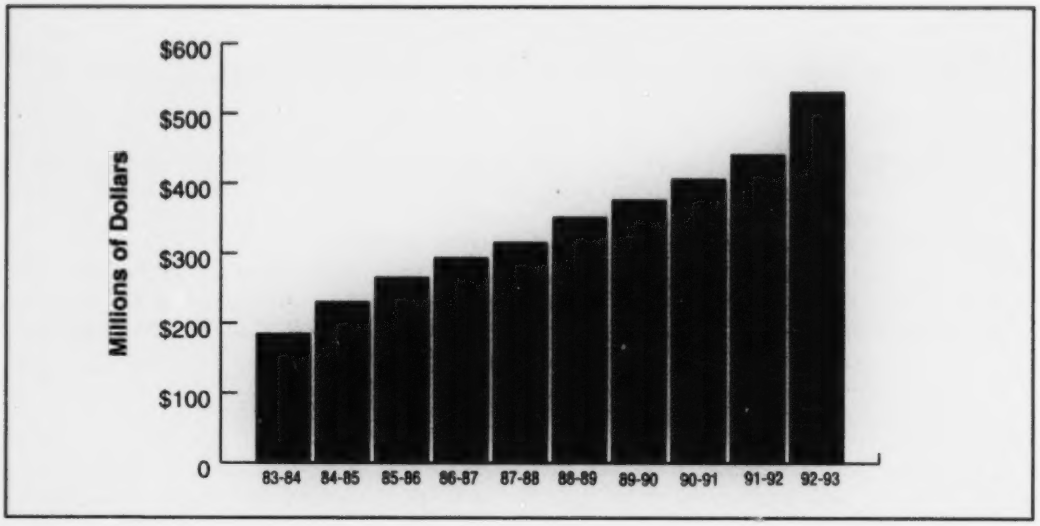
7 Ibid

ENDOWMENT

Total endowments for all UNCF member institutions exceeded a half billion dollars for the fiscal year ending June 30, 1993. Led by Spelman College with an endowment fund of over $108 million, the grand total of all endowment funds at UNCF colleges was $529.5 million for the reporting year. The overall one-year increase in the market value of the endowment funds was nearly 20 percent rising from $441.5 million to the current figure of $529.5 million. The average value of the endowment funds was $12.9 million. The growth of the endowment funds at UNCF colleges has been spectacular over the past several years. Ten years ago, the Statistical Report showed that the largest endowment at any UNCF institution was only $27 million. Figure 14 below graphically shows the growth of the endowment funds in the ten year period since 1983-84.

FIGURE 14.

UNCF Endowment Funds
Growth of Funds Since 1983-84



About two-thirds of UNCF institutions hold endowments of less than $10 million. See Table 18. In addition to Spelman, ten other UNCF institutions—Benedict, Bethune-Cookman, Clark Atlanta, Dillard, Morehouse, Rust, St. Augustine's, Stillman, Tuskegee, and Xavier each hold endowments valued at over $15 million. The eleven institutions with endowments over $15 million account for nearly two-thirds of the total held by all UNCF institutions.

TABLE 18.

Distribution of Endowment Funds
UNCF Member Institutions 1992-93

Value of Endowment	Number of UNCF Institutions	Percentage of All UNCF Institutions
over $100 million	1	2
$50 —— 59 million	1	2
$40 —— 49 million	1	2
$30 —— 39 million	0	0
$20 —— 29 million	2	5
$15 —— 19 million	6	15
$10 —— 14 million	2	5
$ 5 —— 9 million	14	34
$ 1 —— 4 million	13	32
under $1 million	1	2

Appendix CC shows the market values of the endowment funds for the past three reporting years at each individual UNCF institution.

Endowment Compared with Other Private Colleges

Although UNCF colleges have been making great strides in the strengthening of their endowment funds, it is important to compare endowments held by the UNCF institutions with other private colleges. Although the $12.9 million average value of endowment funds at UNCF institutions represents much improvement, this amount is still considerably below the level reported by other private liberal arts colleges. The Council for Aid to Education reported[8] that the average endowment at the 492 private comprehensive and private liberal arts colleges (that filed a report) was $30 million.

The average amount of endowment per student at UNCF colleges and universities now stands at $9,923; this figure has doubled since 1983-84. By contrast, the latest figures at all private colleges show an average per student endowment of over $31,000; thus, the per student endowment figure at UNCF institutions stands at only about one-third that of other private colleges and universities in the United States.

8 Council for Aid to Education, Voluntary Support of Education, 1991. June, 1992, pp. 3-34.
